

**RevoFit® Upper Extremity Adjustable Prosthetic Socket System  
Manufacturer's Suggested Retail Price (MSRP)**

The patented RevoFit® system allows the patient to adjust their prosthetic device for volumetric changes in the residual limb. This technology is made effective when incorporated into the design, fabrication, and fitting of a custom prosthetic device.

Patients may perform multiple self-adjustments throughout the day to accommodate changes in volume, activity, and socket fit. By operating the RevoFit® system the user can improve the fit and comfort of their prosthesis by turning the Click® Reel clockwise to accommodate volume reduction or counterclockwise to accommodate for an increase in volume. A clutch mechanism allows for both a consistent fit and a reference point in relation to adjustments made.

Patients report the donning and doffing of their prosthesis to be easier due to reduced friction and improved access. Accommodating daily changes in volume resulting from: comorbidity, activity, weight gain or loss, has resulted in a reduction in the need for follow up clinic visits for socket adjustment.

**The suggested MSRP has been determined by aggregating cost associated with:**

- 1. Component cost of RevoFit® Kit(s)**
- 2. Additional socket design time to determine adjustable socket area(s)**
- 3. Additional socket fabrication time to integrate kit and create adjustable area(s)**
- 4. Additional material cost (pad, glue, composite adhesive, foam)**
- 5. Additional clinical time educating user on system and IFU (Instructions For Use)**
- 6. Profit**

**MSRP: Adjustable Prosthetic Socket System - \$3,495.00**

**CODE LANGUAGE:  
L7499**

**"Addition to upper extremity (UE), residual limb volume management, and patient adjustable control system"**

Disclaimers:

Coding is ultimately up to the practitioner and the practice.

Use this information only as a guide to possible code utilization and documentation.

The manufacturer's suggested retail pricing (MSRP) is a suggested retail price only. Click Medical has provided the suggested MSRP in the event that third-party and/or federal healthcare payors request it for reimbursement purposes. The practitioner and/or patient care facility is neither obligated nor required to charge the MSRP when submitting billing claims for third-party reimbursement for the product (s).
