

## Secure suspension made easy.

Safe, predictable alignment and suspension. **Just turn the dial.**

### How it works

Your provider will integrate RevoLock® into your socket, providing a secure suspension system that gently draws your limb into place with a twist of a dial. It also allows for micro-adjustments throughout the day for continued comfort.

“The RevoLock® system lets me dial myself down into my socket, so I have the **right fit and suspension every time.**”

- Kim “Tin Man” Acheson, RevoLock user

### Who is it for?

If any of these sound like you, RevoLock® could be your perfect solution.

#### Do you:

- Struggle with your current suspension system?
- Have trouble locating a pin lock?
- Have long or bulbous limbs?
- Have large volume changes during the day?
- Struggle with balance when donning your socket?
- Have a limited range of motion?

Talk to your practitioner about how **RevoLock®** can help you focus more on your life and less on your socket.
